Abstract of EP1103922

The booking method has a reservation request received from a customer by a reservation agent, with the customer charge logged by the agent and an electrical signal containing coded data corresponding to an access authorisation transmitted back to the customer, for storage on an electronic data carrier, acting as a virtual entry ticket. Also included are Independent claims for the following: (a) a central server for a reservation booking method; (b) a computer program for a reservation booking method
